

Radiology Contrast Administration Safety

SYNTHETIC TEST DATA — This document was generated for RAG system development and testing only. It does not represent real clinical guidance, a real hospital policy, or real patient information. Do not use for actual patient care.

Document ID: DOC_049 | Type: guideline | Domain: radiology

Purpose

This synthetic guideline illustrates the structure and content style of a domain guideline document for radiology workflows.

Key Recommendations

#	Recommendation
1	Verify patient identity with two identifiers before any contrast administration
2	Confirm renal function status prior to iodinated contrast
3	Document laterality explicitly for all paired body structures
4	Route STAT studies to the top of the radiologist review queue
5	Require an impression section before a report can be signed off
