

Laboratory Specimen Integrity Standards

SYNTHETIC TEST DATA — This document was generated for RAG system development and testing only. It does not represent real clinical guidance, a real hospital policy, or real patient information. Do not use for actual patient care.

Document ID: DOC_053 | Type: guideline | Domain: laboratory

Purpose

This synthetic guideline illustrates the structure and content style of a domain guideline document for laboratory workflows.

Key Recommendations

#	Recommendation
1	Confirm specimen type matches test requirements before collection
2	Label specimens at the patient's bedside, never in advance
3	Flag any result outside the reference range rather than releasing it as routine
4	Notify the responsible provider within the defined critical-value window
