

Contrast Safety Screening — Screen Instructions & Validation Rules

SYNTHETIC TEST DATA — This document was generated for RAG system development and testing only. It does not represent real clinical guidance, a real hospital policy, or real patient information. Do not use for actual patient care.

Document ID: DOC_027 | Type: screen_instructions | Domain: radiology | Workflow: WF_001 | Screen: SCREEN_03

Purpose

This screen captures the information needed to progress the "Contrast Safety Screening" step of workflow WF_001.

Fields on This Screen

Field	Required
Contrast Required	Yes
Renal Function Value	Yes
Prior Contrast Reaction	Yes
Allergy List	Yes

Required Verifications

#	Required Verification
1	Confirm renal function value is on file and within an acceptable range before contrast administration
2	Confirm the allergy list has been reviewed for contrast-related allergies
3	Confirm any prior contrast reaction is flagged and visible before proceeding

Common Errors & Recovery

Common Error	Likely Cause
Contrast marked required with no renal function value on file	Data entry or workflow-timing issue
Prior reaction flag not surfaced to the technologist	Data entry or workflow-timing issue
