

Surgical Site Verification Standards

SYNTHETIC TEST DATA — This document was generated for RAG system development and testing only. It does not represent real clinical guidance, a real hospital policy, or real patient information. Do not use for actual patient care.

Document ID: DOC_057 | Type: guideline | Domain: surgery

Purpose

This synthetic guideline illustrates the structure and content style of a domain guideline document for surgery workflows.

Key Recommendations

#	Recommendation
1	Perform a formal time-out with the full team before incision
2	Confirm surgical site marking matches the consented procedure
3	Reconcile instrument and sponge counts before closure
4	Document ASA classification prior to the procedure
